

WAREHOUSE FULFILLMENT

TIRED OF MANAGING YOUR OWN FULFILLMENT CENTER?

LOOKING FOR EXPERIENCED STAFF TO INVENTORY & FULFILL PRODUCTS WITHOUT HEADACHES?

SEEKING A THIRD-PARTY PROVIDER FOR MORE COST-EFFECTIVE WAREHOUSING?

What TEK Can Do For You

For warehousing and distribution of a wide variety of goods, TEK Industries offers a uniquely adaptable suite of resources to save you money and provide first-rate service for your own customers. Our highly-skilled workforce puts years of experience to work for you in more than 100,000 square feet of secure, temperature controlled space, where you have on-line access to account information and inventory tracking. We currently handle over 35,000 SKU's for existing customers. We'll even provide materials ordering, labeling, kitting and a host of other process services as needed. Reduce your burden of personnel and materials management by making TEK your warehouse distribution partner.

Services Include:

- Warehousing
- Order processing, fulfillment and shipping
- Materials and supplies requisition
- Inventory storage
- System development/programming
- Inventory receiving and management
- Kitting
- Labeling
- Account administration

You Will Receive:

- Online reporting
- Inventory management
- Returns processing
- Electronic receipt of order transmissions in agreeable format
- Packing slip and shipping label generation/application
- Shipment via client Specified carrier
- Tracking information appended to order record
- Standard reports
- Picking and packing
- Verification of items ordered
- Operational scalability

Benefits to Your Company:

- Increase security
- Achieve greater cost-efficiency
- Focus on your company's core competencies
- Decrease service cost
- Replace costly storage space with revenue generating space
- Increase productivity

EXAMPLE: A manufacturer of consumer product located in the central U.S. was using a fulfillment center on the west coast for products manufactured in China. The geographic distance between the manufacturer and the fulfillment warehouse was jeopardizing timely responses from the account manager and ultimately causing delays in shipping. The manufacturer was unable to track inventory himself and felt a lack of confidence in the warehouse distributor's knowledge of the product and market—or its ability to keep product on the shelf. The west-coast warehouse had to work hard to provide timely deliveries across the continent.

TEK'S SOLUTION: Because TEK offers intentionally-adaptable systems already in place, it was possible to “plug” this manufacturer's product into the system quickly and efficiently, while saving about 30% in costs. Experienced TEK staff designed a secure, polished distribution process using quality-controlled, ISO9000 processes to get product on the shelves and prepped for fast delivery of 60 orders a day and storage of hundreds of pallets. Unlike the previous distributor, because of its own OEM experiences, TEK was able to shop for and recommend a supplier for shipping containers, then act on the manufacturer's behalf to order and stock the boxes for shipping. The manufacturer can review inventory levels and account information anytime night or day online—even making video checks to review warehouse conditions. TEK's central U.S. warehouse location further expedited deliveries across the nation and overseas.
